Objective:

Full time employment on an Agile team

Introduction:

Being an owner/ partner at a startup for the past 3 years opened my eyes to all the various needs of a thriving business. My agency used an Agile philosophy to accomplish large and small projects. I performed many various roles from Client Manager, Product Owner, Scrum Master, Producer, to Delivery. Having vast knowledge of UX Design, Graphic Design, Marketing, and Software Development was critical in being able to communicate between all the intricate moving parts.

I am proficient with many software applications but have the most experience in the Adobe Suite: Photoshop, Illustrator, InDesign, Experience Design, Premiere, Audition, and After Effects. I also have experience with HTML and CSS.
